Scope and Content
Collection consists of artifacts collected by Elliott P. Joslin and the Joslin Diabetes Center that reflect the history of the clinic as well as the history of diabetes treatment and insulin therapy. Includes laboratory equipment and instrumentation, chemicals, and insulin injection kits that date from the early 1930s to the modern era. Also includes personal memorabilia of Elliott P. Joslin such as awards and medals earned for his service to the diabetic and scientific community, medical equipment, and gifts of appreciation from patients.

Container List
